MULTI THREADING

JAVA.LANG.THREAD: The **java.lang.Thread** class is a thread of execution in a program. The Java Virtual Machine allows an application to have multiple threads of execution running concurrently.

Following are the important points about Thread –

- Every thread has a priority. Threads with higher priority are executed in preference to threads with lower priority
- There are two ways to create a new thread of execution. One is to declare a class to be a

		Alisha BVRC 1. Learn programming language very well Programming is about solving problems, a good technique is to break the big problem in small ones to focus on each problem in a better way; you can use pseudo codes in a program. • You can choose one of these: C++, Java, Python. • You can also choose between other languages, but many people use one of the above languages to do competitive programming or implement many useful applications. • Learn to store data efficiently. • Know standard data structures: C++, it is STL, they are collections in Java. 📄 PDF Improve Thinking in P... ⬇ 1 page · PDF · 77 kB 10:50 AM

		PVN Swamy Sir English BVRC It is important to introduce yourself because it shows your ability to meet new people confidently. It makes others feel more comfortable and allows you to make a good first impression. Knowing how to introduce yourself helps you "break the ice" when meeting new people. In all interview based recruitments it's an essential task and one and only link between YOU and your JOB. So that dear students, my sincere advice to you all … Don't neglect this task. Expecting more responses tomorrow…. 8:25 PM	----	----
